DETAILED ACTION

Allowable Subject Matter

- 1. Claims 2-10, and 16-23 are allowable over the prior art of record.
- 2. The following is a statement of reasons for the indication of allowable subject matter:

As per independent claims 6,9,20,23, the recited limitations pertaining to the detailed calculations involving convolutional and additive noise, with calculations of the corresponding vectors, is not explicitly taught by the prior art of record.

Typical prior art is represented by Bahl (4817156) adapting a speech recognition system to speech data (as computing similarity relations (col. 3 lines 36-40; col. 5 lines 50-55); computing spectral representations of speech (col. 5 lines 34-48), including a mean, or average (col. 17 lines 12-16); performing a maximum likelihood estimator (Fig. 15, subblock 608); and linear averaging transition probabilities (col. 16 lines 62-65).

However, neither Bahl (4817156) nor the prior art of record explicitly teach the recited limitations pertaining to the detailed calculations involving convolutional and additive noise, with calculations of the corresponding vectors. Furthermore, it would not have been obvious to one of ordinary skill in the art of speech recognition to modify the features of the prior art of record to obtain the recited claim limitations of independent claims 6,9,20,23 as noted above.
